

### TEMPERATURE/PRESSURE BALANCING VALVE

\*Attach the handle to the valve secure the handle with screw make sure the handle is installed correctly.

\*There is a factory temperature preset, the preset temperature can be changed by first removing the handle and than removing the temperature stop(Green Knob). Catch the green knob with the pliers. Then pull out from the cartridge.

(a)Reinstall to the left of the original position in the cartridge for a lower temperature.

(b)Reinstall to the right of the original position in the cartridge for a higher temperature.

\*Reattach handle to the valve.

**Warning:** Failure to adjust the limit stop screw properly may result in serious scalding.

This shower system may not protect the user from scalding when there is a failure of other temperature controlling devices, elsewhere in the plumbing system.

#### For New Installation:

An optional plaster Guard has been included. This is used as a template for hole size and to protect the valve during construction.

#### Care Instructions

To clean, wipe gently with a soft damp cloth, then wipe dry. Do not use abrasive cleaners, detergents or polishes, as this could damage the finish and void our warranty.
